

Internship Task 1

Tools Used:

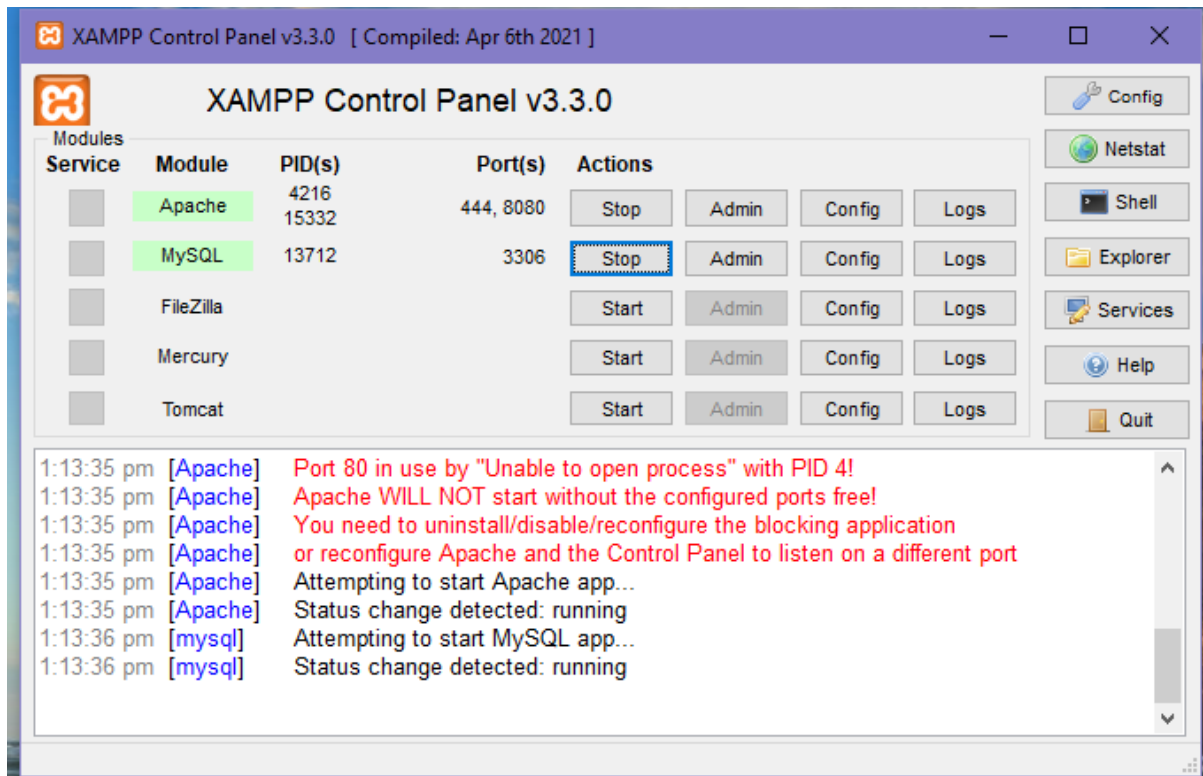

- XAMPP (Local Server Environment)
- WordPress (6.9.4)
- Theme: (Hello Elementor & OcreanWP)
- Plugins: Elementor, Elementor PRO, Contact Form 7, WPForms

Steps Followed:

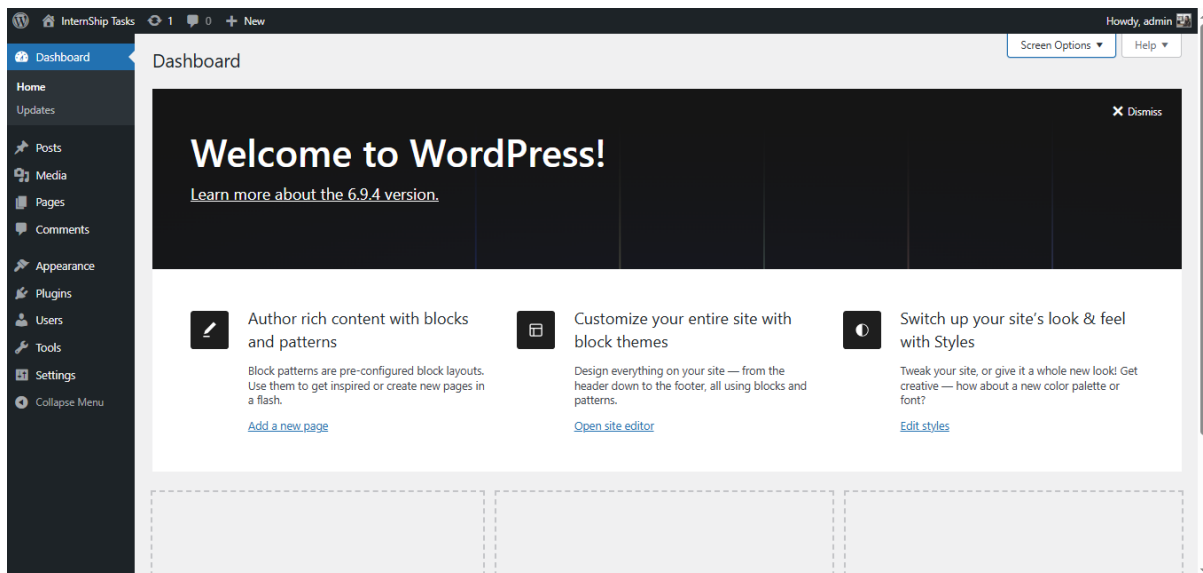

- Installed and configured XAMPP to create a local server environment
- Downloaded and installed the latest version of WordPress
- Created a MySQL database and connected it to WordPress
- Completed initial setup including site title, admin username, and password
- Logged into the WordPress dashboard
- Installed and customized a WordPress theme
- Created basic pages (Home, Blog, About, Services/Portfolio, Contact)
- Set up a navigation menu linking all pages
- Installed essential plugins for design and functionality
